

1. Review in detail the Narcan Policy.
2. Review any gate codes/hazards/area familiarization with new partners, especially FF's that are in a new area. Encourage new partners to spend time discussing response responsibilities, expectations, explain experience/comfort levels with certain call types.
3. Use/train with TIC. Run the TIC battery for a while to ensure it will not fail prematurely. I will provide some material/websites on Monday AM but this is mostly peer-led learning the useful functions and advantages of a TIC in locating hidden fires, missing persons, etc of a TIC.
